

**REPLACEMENT PAGES FOR THE JANUARY 28, 2002, AMENDMENT TO U.S.  
PATENT APPLICATION SER. NO. 09/341,379**

*The replacement for claim 7 is as follows:*

C1  
~~7. The control system of claim 32 wherein said external electronic device includes means for receiving information relating to the operating status of the household appliance.~~

*The replacement for claim 10 is as follows:*

C2  
~~10. The control system of claim 32 wherein said electronic control unit includes a first clock, and said external electronic device includes a second clock for updating the first clock.~~

*The replacement for claim 16 is as follows:*

Sub D2  
C3  
~~16. The control system of claim 15 wherein said management program includes utility functions for use with the household appliance.~~

*The replacement for claim 24 is as follows:*

C4  
~~24. The method of claim 33 wherein said second functions include advising when a given food stored in a refrigerating appliance is approaching an expiry date.~~

*The replacement for claim 28 is as follows:*

C5  
~~28. The method of claim 33 wherein said external electronic device includes a display for displaying baking process parameters.~~

*The replacement for claim 32 is as follows:*

sub D4)  
32. An appliance control system for use with a household appliance that includes an appliance control panel, the system including:

- et
- A. an electronic control unit for controlling the operations of an appliance, the electronic control unit containing stored first information for controlling predetermined first functions and stored second information for controlling predetermined second functions of the appliance,
  - B. selection means for supplying to the electronic control unit data that selects one or more of the first functions and provides related parameter values, the first functions corresponding to appliance operations that are selectable using the appliance control panel;
  - C. connection means for interfacing with an external electronic device, the connection means transferring from the external electronic device to the electronic control unit data that selects one or more of the second functions and provides related parameter values,

wherein the electronic control unit operates the appliance in accordance with the selected one or more first functions based on the stored first information and the data supplied by the selection means or in accordance with the selected one or more second functions based on the stored second information and the data supplied by the external electronic device through the connection means.
